

- It has four pushbuttons simplifying the number of pulses.
- Manufactured with the most advanced electronic components.
- High capacity and low consumption processor.
- Screen where all activity and programming of this device are shown.

Scheme

Technical characteristics

Power supply	230 V. 50/60 Hz.
Ventilation max load	3, 6 y 12A
Max relays load	2A 230V
Analog Proportional Output	NO
Probe type	Pt100 clase B
Precision	0,1°C
Protection level	IP 54
Stop function	
Maximal and minimal programmable percentage of ventilation	
Current ventilation percentage	
Heating, cooling, 2nd ventilation and alarm
