VK - 25DC

Heating controller

Heating controller VK-25DC is a device capable to control any electrical heating system in a safe manner.

It has an auxiliary programmable contact, proportional output for power amplifiers, probe fault detection system, and a maximum load of 20A.

You can program and adjust the device easily and quickly, the controller has only 3 buttons with LED backlight and a 3-digit display.

Heating controller VK-25DC is accurate and secure device that allows at a low power consumption to maintain optimal desired temperature.

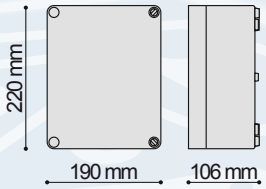
Dimensions



Characteristics

Power supply	230V / 50Hz
Maximum Relays Load	2A / 230V
Analog Proportional Output	0-10Vdc
Precision	0,1ºC
Protection Fuse	125mA
Protection level	IP 54
Maximal and minimal programmable percentage of heating	
Detection of Probe damages	
Current heating percent	
Emi filter	
Comply with CE standards
